

Aero App for Windows Version 1.2007

1. Version Highlights:

Enhancements

- **Moving Map:**
 - **Drag & Drop:** Pilots can drag any segment or point of their current route and drop it to their desired point.
 - **GeoJSON Support:** Aero App supports GeoJSON files. Pilots can load GeoJSON files into Aero App and overlay them on their Moving Map.

2. System requirements:

- Windows OS tablet with Windows 10 or later
- 2GB of RAM, 4GB recommended (for the installation of Aero App and one complete data cycle)
- .NET framework 4.7.2 or later.
