

QUICK START GUIDE

Aero App for iOS

This Quick Start Guide gives users an overview of the various ways to install Aeronautical Application (Aero App) and obtain cycle data. As such, this Quick Start Guide provides important information that is required to start using Aero App.

To learn more about Aero App, refer to the official User Manual documentation provided in this link: aeroapp.info/user-manuals/.

Aero App for iOS requires iOS 15 or later, 16 GB of available storage minimum for Aero App and Aero App cycle data.

1. Troubleshooting

If you have problems that cannot be resolved, please contact the Aero App Support Team:

Phone: 954-323-2244 ext. 412

Email: aeroappsupport@hiltonsoftware.com

Contact Form: aeroapp.info/contactus/

Hours of Operation: Monday - Friday 1000-1800 EST

2. Aero App Installation

Aero App can be installed from:

Option 1. Aero App Website: To access the Aero App website, visit aeroapp.info. Downloading Aero App requires an **Aero User Database** account (userdb.aeroapp.info/auth/register) or a **GEOAXIS** account (geoaxis.nga.mil).

Option 2. Aero App DVD: NGA distributes the Aero App DVD to appropriate personnel.

Option 3. Apple App Store: To access the Apple App Store, visit apple.com/ios/app-store or navigate to the App Store on your Apple device. Downloading the Aero App application requires an Apple ID (appleid.apple.com/account).

3. Downloading Aero App Data

Aero App cycle data can be downloaded from the following sources:

Option 1. Aero App Website: To access the Aero App website, visit aeroapp.info.

Downloading Aero App data requires an **Aero User Database** account (userdb.aeroapp.info/auth/register) or a **GEOAxis** account (geoaxis.nga.mil).

1. Navigate to **Downloads** from the main menu and select **Data**.
2. Log in using GEOAxis or Aero User Database credentials.
3. From the Cycles tab, click **cycles**.
4. Select desired cycle.
5. Select desired data with the appropriate ZIP and SIG files and the downloading process will begin.

Option 2. Amazon Web Services (AWS): Access AWS on Aero App. Downloading Aero App data requires an **Aero User Database** account

(userdb.aeroapp.info/auth/register), a **GEOAxis** account (geoaxis.nga.mil), or **Mobile Device Management (MDM)** configured on your device.

1. Tap **App Mgmt** on the **Main Menu**.
2. Tap **Data** on the **Secondary Menu**.
3. Tap **Download**.
4. Log in to AWS using Aero User Database or GEOAxis credentials, or set up your device with MDM.
5. Tap **Connect**.
6. Follow the prompts then tap **Download** to begin the downloading process.

Option 3. Aero Data Server (ADS): Access ADS on Aero App. This requires a local Wi-Fi network. We recommend the use of ADS Discovery to find ADS servers.

1. Tap **App Mgmt** on the **Main Menu**.
2. Tap **Data** on the **Secondary Menu**.
3. Tap **Download**.
4. Users will be presented with options to Discover, enter Host and Port numbers, and Connect. Tap **Discover** and a list of ADS servers will display.
5. Alternatively, users can manually connect to a server by entering the Host and Port numbers, respectively, in provided fields.
6. Once entered, tap **Connect** to connect to a server.
7. Follow the prompts then tap **Download** to begin the downloading process.

4. Sideload Aero App Data Using DVD

Aero App cycle data can be sideloaded from the **Aero App DVD** to which NGA distributes to the appropriate personnel.

Option 1. Sideload Data Using iTunes: To access iTunes, visit apple.com/itunes. Sideload Aero App cycle data requires an Apple ID (appleid.apple.com/account).

1. Connect your Apple device to a USB or USB-C port of a Windows computer.
2. Open an **iTunes** window.
3. Your device will display on the upper-left corner of the iTunes window. Click to select your device.
4. From the sidebar, select **File Sharing**.
5. Click **Aero App** from the list of Apps.
6. Drag and drop desired cycle data, including Global and their appropriate sig files, from the Aero App DVD onto the Documents list in iTunes.
7. Alternatively, users can click **Add** and manually select the file(s) in which they want to copy onto the device.
8. The files will begin to copy to your device.

Option 2. Sideload Data Using macOS Catalina: macOS Catalina has replaced the iTunes media library with its dedicated applications. Finder is where you can manage and sync content, like Aero App cycle data, to your Apple device. Sideload Aero App cycle data requires an Apple ID (appleid.apple.com/account).

1. Connect your Apple device to a USB or USB-C port of a Mac computer.
2. Open a **Finder** window from the Mac Dock.
3. Your device will display on the sidebar of the Finder window. Click to select your device.
4. Select **Files** from the menu options.
5. Drag and drop desired cycle data, including Global and their appropriate sig files, from the Aero App DVD onto the device.
6. The files will begin to copy to your device.

5. Manage and View Data

Aero App data updates are released periodically. Aero App can load and manage up to two data cycles at a time. The Data Status page displays all loaded data.

1. Tap **App Mgmt** on the **Main Menu**.
2. Tap **Data** on the **Secondary Menu**.
3. The loaded data will display **Found**.
4. Notice the 'No active cycle' message. Move the loaded data into Standby Cycle by tapping **Move to Standby**.
5. Swap data from Standby Cycle to Active Cycle by tapping **Swap Cycles**. Notice 'No active cycle' message is no longer displayed.
6. Tap **View** to list all files in Active Cycle.
