

Aero Data Server (ADS) for macOS ReadMe

General Information

1. Description

The NGA's Aero App provides DOD customers the ability to view our suite of Flight Information Publications (FLIP), FAA sectionals, Enroute charts, as well as new digital only products such as our Airfield Qualification Program (AQP), Giant Reports and textual weather.

Aero Data Server (ADS) allows Aero App on iOS, Android, and Windows mobile devices to download Aero App data cycles over a locally-hosted Wi-Fi network. For the end user, it means they can download data cycles faster and more reliably.

2. **Application Version:** Aero Data Server (ADS) macOS Version 1.2301

3. **Replaces:** Aero Data Server (ADS) macOS Version 1.2209

4. Version Highlights:

Features

- **Georeference:** Aero Data Server enables pilots to georeference JPG, PDF, or PNG images to display on Aero App's Moving Map.

NOTE: Aero Data Server's Help tab has been modified. The Help tab presently redirects users to the aeroapp.info site to access and download the latest User Manuals, Quick Start Guides, and ReadMe files.

Bug Fixes

- Various bug fixes and performance improvements.

5. System requirements:

- Computer running one of the following operating systems:
 - macOS 12 (Monterey) up to macOS 13 (Ventura)
- Minimum of 40GB of available storage
- Minimum 4GB or higher of RAM
- LAN or Wi-Fi connectivity (Wi-Fi or Ethernet, 100 Mbps, 1 Gbps preferred on computer and Wi-Fi Access Point)
